Areeb Elahi

Full Stack Developer | Full Stack Software Engineer

0317-9943488 | dev.areebelahi@gmail.com | GitHub: github.com/AreebElahi | Portfolio: areebelahi.dev

Summary

Full Stack Developer with approximately 2.5 years of freelance software development experience building production-oriented web platforms, business workflows, REST APIs, payment integrations, and data-driven applications. Hands-on experience with React, Next.js, TypeScript, Node.js, Express, PHP, Python/Flask, PostgreSQL, MySQL, MongoDB, Redis, AWS, and machine-learning services.

Technical Skills

Frontend: React, Next.js, TypeScript, Tailwind CSS, Material UI, React Query, Recharts

Backend & APIs: Node.js, Express.js, PHP, Python, Flask, REST APIs, JWT, Webhooks, Zod

Databases & Data: PostgreSQL, Prisma ORM, MySQL, MongoDB, Mongoose, Redis

Cloud, Payments & Tools: AWS, Stripe, PayAdvantage, Docker Compose, Git, BullMQ

Machine Learning: Scikit-learn, XGBoost, Random Forest, Gradient Boosting

Experience

Freelance Full Stack Developer — Jan 2024 – Present

Independent Software Development

- Delivered end-to-end software solutions spanning responsive interfaces, backend services, REST APIs, relational and NoSQL databases, authentication, integrations, debugging, and feature development.
- Built and integrated payment workflows, third-party APIs, webhooks, document processing, role-based systems, real-time data flows, and business administration features across full-stack applications.
- Managed implementation, troubleshooting, iterative feature refinement, and delivery independently based on project and software requirements.

Projects

Edmin — *Next.js, TypeScript, Node.js, PostgreSQL, Redis*

- Developed a multi-role university administration platform covering academics, HR, finance, examinations, attendance, payroll, student services, and communications through role-based dashboards.
- Engineered a Next.js and React frontend with a layered Node.js/Express backend using **PostgreSQL and Prisma**, fine-grained RBAC, JWT authentication, Zod validation, and REST APIs.
- Implemented Redis-backed **BullMQ background processing** and an outbox/event architecture for reliable asynchronous workflows including notifications and transactional email.

AAA Green Rentals — *PHP, MySQL, Stripe, PayAdvantage, AWS*

- Built a full-stack car rental platform connecting a customer booking website with a staff operations dashboard for reservations, dispatch, returns, vehicle management, invoicing, inspections, and document workflows.
- Integrated **Stripe Payment Intents and verified webhooks** for reservation deposits alongside PayAdvantage recurring direct-debit workflows for ongoing rental payments and payment reconciliation.
- Implemented Google OAuth and OTP verification, AWS S3 document storage, PDF generation/viewing, vehicle document history, and automated insurer notifications; deployed on an AWS Ubuntu environment.

BidData EduPredict — *React, Node.js, Flask, MongoDB, Scikit-learn*

- Developed a full-stack University Management System with separate Admin, Instructor, and Student portals for courses, attendance, marks, enrollment, academic records, and role-specific workflows.
- Integrated three independent Python/Flask ML services using **Gradient Boosting, Random Forest, and XGBoost** for student performance prediction, dropout-risk classification, and course-demand forecasting.
- Connected the React frontend to Node.js/Express CRUD APIs and Flask prediction APIs, with MongoDB persistence and interactive analytics for model insights and intervention recommendations.

Education

DHA Suffa University — July 2026

Bachelor of Science in Software Engineering

Certifications & Professional Training

Aptech Computer Education — June 2025

Advanced Diploma in Software Engineering — *Distinction*
